FSC has been dedicated to promoting responsible forest management around the world and upholding the highest standards in responsible forestry at best. We believe that transforming the market into responsible sourcing is not only an effective way to halt deforestation but also the new norm of doing businesses.

The demand for sourcing forestry products responsibly has increased exponentially, and many choose to adopt FSC as their trusted scheme because of its credibility and global recognition. Figures speak for itself: the world now has more than 33,000 Chain of Custody (CoC) certificates, and nearly 2 million hectares are well-managed forests under FSC principles.

In New Zealand, nearly 70% of the production forests are FSC certified and 150 businesses trade FSC products.

By working together we can increase the demand for FSC products and this what this forum aims at.

**FORUM OPPORTUNITIES**

- Build your FSC network across a broad range of industries.
- Understand the global trends for certified forestry products
- Hear more about how to boost your FSC sales.
- Meet with FSC Director General Kim Carstensen and hear about the future of FSC
